

# HOW do you dose Millipred Oral Solution?

Aa Bb Cc Dd Ee Ff Gg Hh Ii Jj Kk Ll Mm Nn Oo Pp Qq Rr Ss Tt Uu Vv Ww Xx Yy Zz

## Millipred™ Oral Solution Initial Daily Dosage

Adult	5 mg (2.5 mL) to 60 mg (30 mL)
Pediatric	0.14 - 2.0 mg/kg/day administered in three or four divided doses

The National Heart, Lung and Blood Institute (NHLBI) guidelines recommend that prednisolone be dosed at 1-2 mg/kg/day for the treatment of acute asthma exacerbation in pediatric patients.

Consult package insert for complete prescribing information

YOUR ASTHMA  
ACTION PLAN.

# Millipred™

(Prednisolone Sodium Phosphate Oral Solution)  
EQUIVALENT TO PREDNISOLONE 10mg/5mL

## Important Safety Information

Millipred™ oral solution is contraindicated in patients with systemic fungal infections. Administration of live or live, attenuated vaccines is contraindicated in patients receiving immunosuppressive doses of corticosteroids. Killed or inactivated vaccines may be administered, however, the response to such vaccines cannot be predicted. Immunization procedures may be undertaken in patients who are receiving corticosteroids as replacement therapy, e.g., for Addison's disease. Adverse reactions of Millipred™ oral solution include the following: cardiovascular (hypertrophic cardiomyopathy in premature infants); dermatologic (facial erythema; increased sweating; impaired wound healing; may suppress reactions to skin tests; petechiae and ecchymoses; thin fragile skin; urticaria; edema); endocrine (decreased carbohydrate tolerance; development of cushingoid state; hirsutism; increased requirements for insulin or oral hypoglycemic agents in diabetic patients; manifestations of latent diabetes mellitus; menstrual irregularities; secondary adrenocortical and pituitary unresponsiveness, particularly in times of stress, as in trauma, surgery or illness; suppression of growth in children); fluid and electrolyte disturbances (congestive heart failure in susceptible patients; fluid retention; hypertension; hypokalemic alkalosis; potassium loss; sodium retention); gastrointestinal (abdominal distention; elevation in serum liver enzyme levels (usually reversible upon discontinuation); pancreatitis; peptic ulcer with possible perforation and hemorrhage; ulcerative esophagitis); metabolic (negative nitrogen balance due to protein catabolism); musculoskeletal (aseptic necrosis of femoral and humeral heads; loss of muscle mass; muscle weakness; osteoporosis; pathological fracture of long bones; steroid myopathy; tendon rupture; vertebral compression fractures); neurological (convulsions; headache; increased intracranial pressure with papilledema (pseudotumor cerebri) usually following discontinuation of treatment; psychic disorders; vertigo); ophthalmic (exophthalmos; glaucoma; increased intraocular pressure; posterior subcapsular cataracts); increased appetite; malaise; nausea; and weight gain. (Refer to package insert for full prescribing information).

## WHAT is Millipred Oral Solution?

Millipred oral solution is a prescription liquid oral corticosteroid indicated as an anti-inflammatory agent for the treatment of certain conditions including but not limited to respiratory, allergic and dermatologic conditions or diseases.

Please consult the package insert for complete prescribing and safety information.

## WHY use Millipred Oral Solution?

- \* Pleasant grape flavor
- \* No refrigeration required
- \* Easy and flexible dosing
- \* Alcohol Free / Dye Free

## WHEN do you use Millipred Oral Solution?

Millipred oral solution is indicated for many different conditions including the control of severe or incapacitating allergic conditions intractable to adequate trials of conventional treatment in adults and pediatric populations with seasonal or perennial allergic rhinitis; asthma; contact and atopic dermatitis; serum sickness; and drug hypersensitivity reactions.

Please consult the back panel or package insert for important prescribing and safety information.

WILL you add Millipred Oral Solution to your Asthma Action Plan?
